# PREDNOSTI MONTAŽNE GRADNJE ADVANTAGES OF PREFABRICATED BUILDINGS

**LoGing**  
SLOVENIA

Hitra in gospodarna izvedba  
Dolga življenjska doba  
Energetsko ekonomična uporaba objekta

Izolacija po namenu in potrebi  
Fleksibilnost pri nadgradnji

Od ideje do izvedbe z lastnim znanjem in proizvodnjo. Mi si ne drzemo, ampak znamo. Tehnologijo obvladujemo in nadgrajujemo. Hitrost gradnje z vrhunskimi materiali, ob podpori najboljših strokovnjakov, so naša garancija za kakovostne in celostne rešitve.

UV-Fast and economical erection  
Long lifespan  
Insulation based on the purpose and your needs

Energy saving usage  
Flexible upgrading

From an idea to the realization with our own knowledge and production. We do not dare, we know. We master our technology. Fast erection using top materials with support of the best experts is our guarantee for qualitative and whole solutions.

**Energetsko varčne rešitve**

Hitre montaže in demontaže ter prestavitve na drugo lokacijo

Razponi brez vmesnih stebrov do 30m, svetla notranja višina do 12 m, dolžina po želji  
Enostavnejši upravni postopki pridobivanja dovoljenj za postavitev

Jeklene vroče cinkane konstrukcije, fasade iz sendvič panelov, strešna termomembranska svetlobopropustna kritina iz dvoslojne ali troslojne kritine z vmesnimi togimi zračnimi blazinami zagotavljajo nosilnost objekta, ekonomičnost ogrevanja in prijetno poletno klimo. Nudimo vam gospodarnost gradnje in mobilnost popolnoma izoliranega objekta. Lahko ga vzamete tudi v najem. Postavimo ga tam, kjer ga najbolj potrebujete. Ob vaši proizvodnji, na vašem zemljišču.

**Energ- Energy saving solutions**

Fast erection, disassembling and relocation

Up to 30 m wide span without columns, up to 12 m high bright interior, customer-defined length  
Less complicated administrative procedures for acquiring building permits

Hot galvanized steel constructions, facades composed of sandwich panels and roofing composed of insulated translucent thermal membrane with one or two stiff air layers ensure the carrying capacity of the building, economical heating and a pleasant summer climate. We offer thrifty erection works and mobility of a fully insulated building. You can also rent a hall. We erect it where you need it most. On your production site, on your premises.

**POSTAVITEV TUDI BREZ TEMELJEV**  
**WITH OR WITHOUT FOUNDATIONS**

**LoGing**

UV stabilni materiali  
Prosojnost po izbiri  
Teflonske izvedbe za samočistilnost površin

Požarna odpornost  
Kompaktnost in nosilnost

Izvedemo še tako zahtevne arhitekturne ideje in želje po doseganju nečesa novega. Arhitektom v ta namen ponujamo vso potrebno podporo z našim znanjem in najnovejšimi materiali. Membranske fasade, pomične strehe, razgibanost membranskih površin so nam znane rešitve. Tudi membrane na osnovi teflonskih materialov, ki prepuščajo UV žarke, ali stekane iz steklenih vlaken in nerjavnega jekla.

UV-stable materials  
Fire resistant  
Teflon-based realizations for self-cleaning of surfaces

Compactness and large carrying capacity  
Translucency at customer's opinion

We bring to life limitless architectural ideas and wishes of achieving something new. We offer architects all the support they need with our know-how and the newest materials. Membrane facades, retractable roofs or varied membrane surfaces are not unknown to us. Also membranes with Teflon-based translucent materials or composed of glass fibers and stainless steel.

Razponi konstrukcije prilagojeni namenu  
Izolativnost objektov glede na namen uporabe

Izvirne rešitve notranje naravne osvetlitve  
Termomembranska ali klasična streha

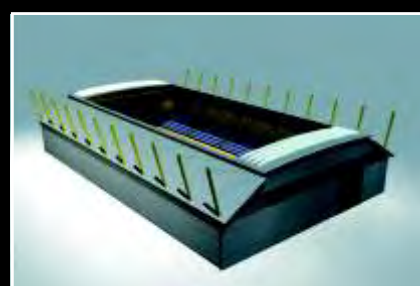

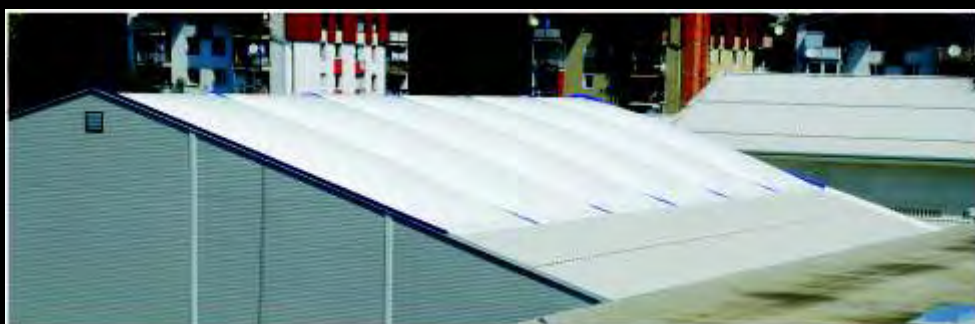

Športne dvorane za večnamensko uporabo ali za določeno športno zvrst izvedemo v atraktivni obliki in po zahtevanih normativih. Posebno pozornost namenjamo gospodarnosti investicije. Novi materiali nudijo dodatne možnosti arhitektom za umeščanja gradnje v prostor. Visoka funkcionalnost objektov in ugodno počutje športnikov ter gledalcev je naše osnovno vodilo.

Construction span adjusted to the purpose  
Insulation according to the purpose of usage

Original solutions for natural lightning of the interior  
Thermo-membrane or classical roof

Sports halls for multipurpose use or for a particular sport are erected in an attractive design and on high standards. We pay close attention to the economical aspect of the investment. New materials provide new possibilities for architects to place the building on the site. High functionality of the facilities and a pleasant environment for athletes and spectators is our basic guideline.

Evropske norme, skrb za okolje, energetska varčnost so naša osnova za kreiranje funkcionalnih rešitev. Z našim znanjem in inovativnim pristopom vam zagotavljamo izvirne rešitve, hitro gradnjo in gospodarne izvedbe. Pripravimo vam optimalne rešitve od ideje do postavitve in vzdrževanja.

European norms and low energy usage are our basis for creating functional solutions. With our buildings we guarantee you the uniqueness of the erection, speed, economical solutions and our know-how. From an idea to the construction of the building and service – our experts offer you optimized solutions.
